# THE DIFFERENT SIDE OF VALENCIA

---

Valencia is the third city in Spain, after the capital Madrid and the very popular city of Barcelona. Valencia is the capital of the province and region of the same name. The city officially has over eight hundred thousand inhabitants. Including the suburbs you come to a metropolitan area in which almost two million people live. Valencia is located on the east coast of Spain and has gained enormous popularity in recent years as a city break destination. This is partly due to the fact that Valencia is easily accessible by plane.

The city is also easily accessible from the seaside resorts located on the Costa Blanca and the Costa del Azahar. For tourists who stay here, a day in Valencia is a pleasant break from a sunny holiday in Spain.

Valencia has a number of ingredients that are similar to Barcelona. The city has a historic city center, there are several sights that are really worthwhile, the Valencian beaches are there for the sun-sea-beach factor in the summer and there are a number of special buildings that distinguish Valencia from other cities. These highlights of modern architecture have been gathered in the new Ciudad de las Artes y Ciencias neighborhood. Here art, culture and science are fused together.
