THE DIFFERENT SIDE OF BARCELONA

Barcelona, the cosmopolitan capital of Spain's Catalonia region, is not only known for its art but also because of its architecture. The Sagrada Família church and other modern landmarks designed by Antoni Gaudí can be found all around the city.

The cradle of Catalan culture, amongst many other cultures and civilisations, and a witness to major transformations such as the Industrial Revolution or the Civil War amongst many others, Barcelona has a fascinating history.

Because Barcelona is located next to the sea, there is always the possibility to do something, whatever the time of the year. There are countless Spanish restaurants who are able to provide you with the real taste of Spain. Not only the art and architecture of Barcelona is amazing to see, in the city center there is enough place for some nice activities in the sun such as discovering the city or to do some shopping.
